We delivered strong fee growth in our core, while adding capabilities, products, and services. We believe we have a multi-year opportunity to leverage our investments and momentum."

"Our credit continues to perform well, consistent with our aggregate moderate-to-low risk appetite. Our credit results for the quarter, including net charge-offs, reflect stability, supported by a positive economic environment."

Fully-taxable equivalent (FTE) net interest income for the 2024 fourth quarter increased \$82 million, or 6%, from the 2023 fourth quarter. The results primarily reflect a \$13.9 billion, or 8%, increase in average earning assets, partially offset by a \$14.6 billion, or 11%, increase in average interest-bearing liabilities and a 4 basis point decrease in the net interest margin (NIM) to 3.03%. The 4 basis point decrease in NIM was reflective of a decrease in non-interest bearing deposits as a percentage of total deposits and a decrease in yields on interest earning assets, partially offset by a decrease in cost of funding.

Compared to the 2024 third quarter, FTE net interest income increased \$45 million, or 3%, driven by an increase in average earnings assets of \$3.3 billion, or 2% and an increase in NIM of 5 basis points to 3.03%, partially offset by an increase in average interest-bearing liabilities of \$2.8 billion, or 2%. The 5 basis point increase in NIM was reflective of a decrease in cost of funding, partially offset by an increase in interest-bearing liabilities and a decrease in yields on interest-bearing assets.

During the quarter, Huntington sold approximately \$1.0 billion of corporate debt investment securities, resulting in a pre-tax loss of \$21 million. Huntington has subsequently completed the re-investment of proceeds in the first quarter of 2025, re-investing in 0% risk-weighted investment securities, with an expected earn-back from the transaction of less than 2 years.

Total noninterest income for the 2024 fourth quarter increased \$154 million, or 38%, from the year-ago quarter. The 2024 fourth quarter included a \$21 million loss on the sale of investment securities discussed previously, while the 2023 fourth quarter included a \$74 million mark-to-market adjustment on pay-fixed swaptions, \$2 million of contra revenue related to premium costs and mark-to-market associated with credit risk transfer transactions, and a \$3 million loss on sales of securities. Excluding the impact from these items, noninterest income increased \$96 million, or 20%, compared to the year-ago quarter. Capital markets and advisory fees increased \$51 million, or 74%, primarily due to higher advisory and underwriting fees. Payments and cash management revenue increased by \$12 million, or 8%, reflecting higher card and merchant acquiring transaction revenue.

Total noninterest income increased \$36 million, or 7%, compared to the 2024 third quarter. The 2024 fourth quarter included a \$21 million loss on the sale of investment securities discussed previously, while the 2024 third quarter included \$8 million of contra revenue related to premium costs and mark-to-market associated with credit risk transfer transactions. Excluding the impact from these items, noninterest income increased \$49 million, or 9%, over the prior quarter, with the increase primarily driven by higher capital markets and advisory fees. Capital markets and advisory fees increased \$42 million, or 54%, primarily due to higher advisory fees, partially offset by a decrease in interest rate derivative fees.

Reported total noninterest expense for the 2024 fourth quarter decreased \$170 million, or 13%, from the year-ago quarter. Excluding the impact from Notable Items, noninterest expense increased \$59 million, or 5%, primarily driven by higher personnel costs of \$72 million, or 11%, due to higher incentive compensation and salary expense, and higher outside data processing and other services of \$10 million, or 6%, reflecting higher technology and data expense. Partially offsetting these increases, other noninterest expense decreased \$15 million, largely due to lower franchise and other taxes.

Reported total noninterest expense increased \$48 million, or 4%, from the 2024 third quarter. Excluding the impact from Notable Items, noninterest expense increased \$57 million, or 5%, primarily driven by higher personnel costs of \$43 million, or 6%, due primarily to higher incentive compensation.

See Pages 12-15 of Quarterly Financial Supplement for additional detail.

Nonperforming assets (NPAs) were \$822 million, or 0.63%, of total loans and leases, OREO and other NPAs, compared to \$711 million, or 0.58%, a year-ago. Nonaccrual loans and leases (NALs) were \$783 million, or 0.60% of total loans and leases, compared to \$667 million, or 0.55% of total loans and leases, a year-ago. The increase in NPAs was driven by increases in commercial and industrial and home equity NALs, partially offset by a decrease in commercial real estate NALs. On a linked quarter basis, NPAs increased \$38 million, or 5%, and NALs increased \$45 million, or 6%. The increase in NPAs was primarily driven by increase in commercial and industrial NALs, partially offset by a decrease in commercial real estate NALs.

The provision for credit losses decreased \$19 million year-over-year and increased \$1 million quarter-over-quarter to \$107 million in the 2024 fourth quarter. Net charge-offs (NCOs) increased \$3 million year-over-year and \$4 million quarter-over-quarter to \$97 million. NCOs represented an annualized 0.30% of average loans and leases in the current quarter, down from 0.31% in the year-ago quarter and unchanged from the prior quarter. Commercial and consumer net charge-offs were 0.29% and 0.32%, respectively, for the 2024 fourth quarter.

The allowance for loan and lease losses (ALLL) increased \$11 million from the year-ago quarter to \$2.2 billion, or 1.73% of total loans and leases. The allowance for credit losses (ACL) increased by \$46 million from the year-ago quarter to \$2.4 billion, or 1.88% of total loans and leases. The ACL coverage ratio was 1.88%, 5 basis points lower than the prior quarter and 9 basis points lower than the year-ago quarter, reflective of the current macroeconomic environment.

Total risk-weighted assets (1)	\$ 143.7	\$ 142.5	\$ 139.4	\$ 139.6	\$ 138.7

(1) December 31, 2024 figures are estimated. Amounts are presented on a Basel III standardized approach basis for calculating risk-weighted assets. The capital ratios reflect Huntington's 2020 election of a five-year transition to delay for two years the full impact of CECL on regulatory capital, followed by a three-year transition period, with the cumulative CECL deferral fully phased in beginning January 1, 2025. As of December 31, 2024, September 30, 2024, June 30, 2024, and March 31, 2024, 75% of the cumulative CECL deferral has been phased in. As of December 31, 2023, 50% of the cumulative CECL deferral has been phased in.

See Pages 16-17 of Quarterly Financial Supplement for additional detail.

The tangible common equity to tangible assets ratio was 6.1% at December 31, 2024, a decrease from 6.4% at September 30, 2024, driven by changes in accumulated other comprehensive income and an increase in tangible assets, partially offset by an increase in tangible common equity from current period earnings, net of dividends. Common Equity Tier 1 (CET1) risk-based capital ratio was 10.5% at December 31, 2024, an increase from 10.4% at September 30, 2024, driven by current period earnings, net of dividends, partially offset by higher risk-weighted assets during the quarter.

In the quarter, Huntington completed a credit linked note transaction, related to an approximately \$4 billion pool of on-balance sheet prime indirect auto loans as part of the company's capital optimization strategy. The transaction reduced risk-weighted assets by approximately \$3 billion.

Income Taxes

The provision for income taxes was \$135 million in the 2024 fourth quarter compared to \$116 million in the 2024 third quarter. The effective tax rate for the 2024 fourth quarter was 20.1%, compared to 18.2% for the 2024 third quarter, with the increase quarter-over-quarter driven by discrete tax expenses recognized in the current quarter.

At December 31, 2024, we had a net federal deferred tax asset of \$684 million and a net state deferred tax asset of \$109 million.

Basis of Presentation

Use of Non-GAAP Financial Measures

This document contains GAAP financial measures and non-GAAP financial measures where management believes it to be helpful in understanding Huntington's results of operations or financial position. Where non-GAAP financial measures are used, the comparable GAAP financial measure, as well as the reconciliation to the comparable GAAP financial measure, can be found in this document, the financial supplement, conference call slides, or the Form 8-K related to this document, all of which can be found in the Investor Relations section of Huntington's website, <http://www.huntington.com>.

Annualized Data

Certain returns, yields, performance ratios, or quarterly growth rates are presented on an "annualized" basis. This is done for analytical and decision-making purposes to better discern underlying performance trends when compared to full-year or year-over-year amounts. For example, loan and deposit growth rates, as well as net charge-off percentages, are most often expressed in terms of an annual rate like 8%. As such, a 2% growth rate for a quarter would represent an annualized 8% growth rate.

Fully-Taxable Equivalent Interest Income and Net Interest Margin

Income from tax-exempt earning assets is increased by an amount equivalent to the taxes that would have been paid if this income had been taxable at statutory rates. This adjustment puts all earning assets, most notably tax-exempt municipal securities, and certain lease assets, on a common basis that facilitates comparison of results to results of competitors.

Rounding

Please note that items in this document may not add due to rounding.

Notable Items

From time to time, revenue, expenses, or taxes are impacted by items judged by management to be outside of ordinary banking activities and/or by items that, while they may be associated with ordinary banking activities, are so unusually large that their outsized impact is believed by management at that time to be infrequent or short term in nature. We refer to such items as "Notable Items." Management believes it is useful to consider certain financial metrics with and without Notable Items, in order to enable a better understanding of company results, increase comparability of period-to-period results, and to evaluate and forecast those results.

Notes:

The preparation of financial statement data in conformity with accounting principles generally accepted in the United States (GAAP) requires management to make estimates and assumptions that affect amounts reported. Actual results could differ from those estimates.

During the fourth quarter 2024, Huntington updated the presentation of our reported deposit categories to align more closely with how we strategically manage our business. As a result, we now report our deposit composition in the following categories: (1) demand deposits - noninterest bearing, (2) demand deposits - interest bearing, (3) money market, (4) savings, and (5) time deposits. Prior period results have been adjusted to conform to the current presentation.

Non-GAAP Financial Measures

This document contains GAAP financial measures and non-GAAP financial measures where management believes it to be helpful in understanding our results of operations or financial position. Where non-GAAP financial measures are used, the comparable GAAP financial measure, as well as the reconciliation to the comparable GAAP financial measure, can be found herein.

Fully-Taxable Equivalent Basis

Interest income, yields, and ratios on a FTE basis are considered non-GAAP financial measures. Management believes net interest income on a FTE basis provides a more accurate picture of the interest margin for comparison purposes. The FTE basis also allows management to assess the comparability of revenue arising from both taxable and tax-exempt sources. The FTE basis assumes a federal statutory tax rate of 21%.

Non-Regulatory Capital Ratios

In addition to capital ratios defined by banking regulators, the Company considers various other measures when evaluating capital utilization and adequacy, including:

- Tangible common equity to tangible assets,
- Tangible common equity to risk-weighted assets using Basel III definition, and
- Adjusted common equity tier 1 (CET1).

These non-regulatory capital ratios are viewed by management as useful additional methods of reflecting the level of capital available to withstand unexpected market conditions. Additionally, presentation of these ratios allows readers to compare the Company's capitalization to other financial services companies. The tangible common equity ratios differ from capital ratios defined by banking regulators principally in that the numerator excludes preferred securities, the nature and extent of which varies among different financial services companies. The adjusted CET1 ratio differs from the defined CET1 regulatory capital ratio the Company is subject to by including the impact of accumulated other comprehensive income (loss) (AOCI) excluding cash flow hedges in the calculation of the capital ratio. These ratios are not defined in GAAP or federal banking regulations. As a result, these non-regulatory capital ratios disclosed by the Company may be considered non-GAAP financial measures.

Because there are no standardized definitions for these non-regulatory capital ratios, the Company's calculation methods may differ from those used by other financial services companies. Also, there may be limits in the usefulness of these measures to investors. As a result, the Company encourages readers to consider the consolidated financial statements and other financial information contained in the related press release in their entirety, and not to rely on any single financial measure.

(1) December 31, 2024 figures are estimated.

(2) Upon adoption in 2020, Huntington elected to temporarily delay certain effects of CECL on regulatory capital, utilizing a two-year delay followed by a three-year transition period. January 1, 2022 began the three-year transition period, whereby 100% of the day-one impact of adopting CECL and 25% of the cumulative change in the reported allowance for credit losses since adopting CECL will be recognized over the three-year transition period, with the cumulative CECL deferral fully phased in beginning January 1, 2025. As of December 31, 2024, September 30, 2024, June 30, 2024, and March 31, 2024, 75% of the cumulative CECL deferral has been phased in. As of December 31, 2023, 50% of the cumulative CECL deferral has been phased in.

(3) Huntington believes certain non-GAAP financial measures to be helpful in understanding Huntington's results of operations. The following provides the comparable regulatory financial measure, as well as the reconciliation to the comparable regulatory financial measure.
